

5 Reasons you should use APEX SCHEDULER

1

Strengthen your existing solutions

Having Apex Scheduler you dont need to scrap your existing scheduler,as it integrated to improve functionality of your existing solution. So you dont have to learn any new software.

2

Data Quality Improvement in inputs

Apex Scheduler reconciles your data in near real time so that any meter or movement errors are detected and corrected to provide you the most accurate schedules.

3

Optimizes variables for optimum yields

Apex scheduler removes the guess work as it optimizes the network and provides cut points to meet planning targets, product demands, most valuable product mix value.

4

Maximize Profits & Eliminate Losses

Eliminate losses such as giveaway, demurrage and maximize value as Apex Scheduler provides optimized blend recipes, movement & lifting schedules from feed to products

5

Scheduling Digital Decision Support System

Outputs data in database, reports or dashboards acting as a decision support system for schedulers working in near real time to provide actionable intelligence
